PERRY BIO-WOOD MEDIA

Proven Biological Technologies

PERRY BIO-WOOD biofilter media is a proprietary blend of organic materials for the removal of complex odors and VOCs.

PRODUCT SPECIFICATIONS

- Bulk Density (Dry) – 20 lb/ft³
- Differential Pressure – 0.25"/ft media
- EBRT – project specific
- Face Velocity – 2-6 fpm

PERRY BIO-WOOD is a fibrous cellular substrate material manufactured only from trees and large tree branches. No yard/construction/demolition waste, or trees with known inhibitors or germicidal effects on microorganisms are used, including but not limited to: eucalyptus, cedar, or redwood.
