American Airlines  
Oklahoma City, OK

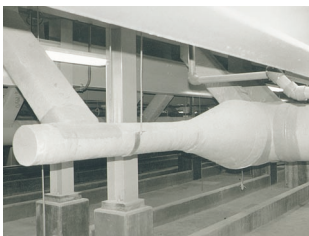

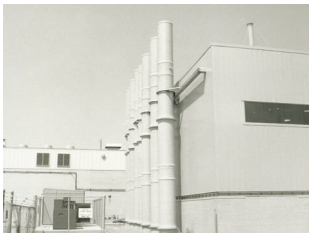

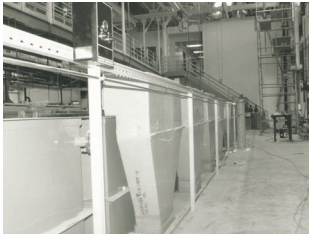

Perry Fiberglass Products, Inc.

is a leading manufacturer  
of high quality fiberglass  
reinforced plastic (FRP)  
products for heating and  
ventilation systems and  
industrial exhaust.

### A Job Well Done in Fiberglass Reinforced Plastic (FRP)

The combination of technical capability and reliable deliveries were demonstrated by Perry Fiberglass in the fabrication of the FRP hoods, ducts, and stacks for a major plating installation. The installation was for approximately 230,000 CFM scrubbed and exhausted through eight 42" diameter stacks.

All material was fabricated, piece-marked, and delivered on time meeting project schedule. When completed the owner, engineer, and contractor expressed their satisfaction with the performance of Perry Fiberglass products.

*Numerous views  
of the American  
Airlines project*

Whatever your need, you can  
count on Perry Fiberglass for  
**high quality duct backed  
by excellent service.**
