PERRY BIO MEDIA LAVA

Proven Biological Technologies

Nature's billion-year-old natural ecosystem for sulfur oxidizing bacteria. PERRY BIO MEDIA LAVA is specifically engineered and processed for chemical resistance, size, and optimum surface area for H₂S removal.

PRODUCT SPECIFICATIONS

- Bulk Density (Dry) – 51 lb/ft³
- Differential Pressure – 0.125"/ft media
- Biological EBRT – projectspecific
- Face Velocity – 20-70 fpm

PERRY BIO MEDIA LAVA has been successfully utilized in numerous biological applications, and as a base layer to significantly extend the life of organic biofilter media.
